

Policy matchmaking sessions

Taking place at 'Europe, let's cooperate'

10 April 2019, Brussels

Do you manage Structural Funds programmes? Would you like to improve the efficiency and effectiveness of your operational programme in one of the following topics – Research and innovation (TO1), SME competitiveness (TO3), Low-carbon economy (TO4) or Environment and resource efficiency (TO6)?

If so, the Interreg Europe [Policy Learning Platform](#) is here to serve **you**. The Platform offers shortcuts to smart solutions for European cities and regions via free, on-demand expert services and a community of peers.

Join us in Brussels on 10 April to benefit from our **personalised matchmaking service** for managing authorities and intermediate bodies of Structural Funds programmes.

What is a policy matchmaking session?

Thematic discussions moderated by an expert in the field that are **designed around the needs and challenges expressed by a specific regional policymaker**. It is a great opportunity to meet like-minded peers and get inspiration from good practice in other parts of Europe.

Three reasons to join:

- **CONNECT with peers and find solutions tailored to your regional needs.** Get inspiration and develop valuable connections with policymakers who are working on similar topics and policies in other parts of Europe.
- **LEARN how to benefit more from our Platform services.** Find out how you can build on the learning from your matchmaking session by using our expert support or peer review services. Discover other policy learning opportunities offered by the Platform online and in person.
- **TAKE PART in an event that brings together policymakers** and practitioners from regions across Europe. Networking opportunities, inspiration and learning occasions will be plenty.

Interested? Here are the sessions planned and the booking status:

1. Research and innovation / Tackling the digital divide – digitalisation of public documentation services (booked)
2. Low-carbon economy / Setting up one-stop-shops for energy refurbishment in buildings (booked)
3. Environment and resource efficiency / Systematisation and valorisation of cultural heritage sites (booked)
4. SMEs competitiveness – **still open, book it now!**

Contact us to learn more! Our experts are looking forward to discussing with you which challenges we could help you address through a matchmaking meeting.
